Harvest 20 to 45 Bushel to Acre Wheat in WESTERN CANADA

Think what that means to you in good hard dollars with the great demand for wheat at high prices. Many farmers in Western Canada have paid for their land from a single crop. The same success may still be yours, for you can buy on easy terms.

Farm Land at \$15 to \$30 an Acre

located near thriving towns, good markets, railways—land of a kind which grows 20 to 45 bushels of wheat to the acre. Good grazing land at low prices convenient to your grain farm enable you to reap the profits from stock raising and dairying.

Learn the Facts About Western Canada

—low taxation (none on improvements), healthful climate, good schools, churches, pleasant social relationships, a prosperous and industrious people.

For illustrated literature, maps, description of farm opportunities in Manitoba, Saskatchewan and Alberta, reduced railroad rates, etc., write Department of Immigration, Ottawa, Canada, or

MARTHA JANE A DIPLOMAT

Even Stern Mamma Couldn't Deny She Had Obedied the Strict Letter of the Law.

Martha Jane's sweet tooth had been indulged so much that her mother had issued the decree, "No more candy," and the remainder of the box had been relegated to the top shelf. A few days ago it was brought down and judiciously apportioned to Martha Jane, for whom a taste spelled more, and even a second taste did not satisfy. When her mother saw her about to take a third helping she remarked, emphatically:

"Now, don't let me see you take another piece."

Presently Mrs. S— was called from the room, and when she returned she found her four-year-old daughter in the farthest corner of the couch, hastily making way with a nice, plump chocolate cream.

"Martha Jane," said her mother, in her sternest tones, "didn't I tell you not to let me see you take another piece of candy?"

"I know you did, mother," said the little diplomat, "but I took this one while you were gone."

Plain Diagnosis.

"Here is the case of a physician arrested because he prescribed whisky for a patient without inquiring what the patient wanted the whisky for."

"Any dub could tell that without asking. The patient wanted a drink."

Age and a little brother tell on a girl.

In South America boys and girls never play together.

"SLANG" ROOT OF LANGUAGE

Idiom of Today in Correct Usage Tomorrow, Declares University Professor of English.

That the slang and idioms of today will be correct English tomorrow is the opinion of Prof. H. Glicksman of the English department, University of Wisconsin.

"Our language is made up of what was once slang, idiom, colloquialism, and jargon," he said lately, and warned that the most deplorable feature about slang was its tendency to produce mental slovenliness.

Professor Glicksman then referred to the word "mob" as slang of 200 years ago and as such denounced in the Spectator by Addison.

"It is an abbreviation of the word 'mobile.' Even so the word 'pep' is vital and virile and will survive with the word 'snappy.' But to gain recognition slang must be free from vulgarity and cheapness," said Professor Glicksman.

"The term 'How do you get that way?' is condemned because it is meaningless, but the term 'he has a pull' is approved as it is the opposite of 'push,' a word that has forged ahead through its own strength."—Outlook.

No Smoking Allowed.

"Did you tell her that smoking isn't allowed?"

"Yes."

"Did you point out the notice?"

"Yes."

"Well, what did she do?"

"Lit her cigarette with it."—Tit-Bits.

Shawls are of oriental origin.

One Trial of Grape-Nuts

will do more than many words to convince you of the goodness of this wheat and barley food.

But it's worth saying that Grape-Nuts contains all the nutriment of the grains, is ready to eat, requires no sugar and there's no waste.

Grape-Nuts is a Builder

WASHINGTON GOSSIP

Trying to Demobilize the Civilian War Machine

WASHINGTON.—The army and the navy are demobilized, but how to demobilize the civilian war machine, with its army of superfluous employees and its swollen pay roll, is a big problem with which congress is wrestling.

Before the war there were approximately 500,000 civil employees in the entire country. Now there are 726,369, in part as follows:

Department of labor.....	2,414
Department of interior.....	5,454
War department.....	200,000
Public printer.....	5,097
Department of commerce.....	12,755
Department of agriculture.....	20,484
Navy department.....	104,432
Post office department.....	291,234
Treasury department.....	71,070
Interstate commerce commission.....	1,785
Shipping board.....	2,500

Members of congress, secretaries, clerks, help about capitol, justices of the Supreme court, United States Circuit Court of Appeals, and district court judges, clerks, marshals, United States attorneys, assistant United States district attorneys, ambassadors, and others in the diplomatic and consular service, staffs of congressional library, etc., are at least 6,000. Other figures are: Department of justice, 588; civil service commission, 373; department of state, 798; federal trade commission, 423; federal reserve board, 405; Smithsonian institution, 462; Panama canal, 110.

There are 200,000 more employees today in the government service throughout the country than before the war. Before the outbreak of the war there were 37,908 clerks and other civil employees of the government in the District of Columbia. This force was increased during the war until on November 11, 1918, when the armistice was declared, it numbered 117,454.

Who Wants to Play Hooky After Next September?

THE latest word in pedagogy is embodied in the newly incorporated association, composed of America's foremost educators, the Society for Visual Education, whose purpose is to supplement the present textbook and laboratory system of education with moving pictures, carefully selected and produced by the organization.

Members of the society believe moving pictures will teach at a glance what would require hours of study or of verbal explanation to acquire, and will reduce the cost of education by making it possible to teach the same amount in a shorter time, or more in the same time.

Films are being produced and distribution to schools is to begin in September.

Prof. Rollin D. Salisbury of the University of Chicago, is president of the society, Harley L. Clarke of Chicago, is vice president and general manager, and Prof. Forrest D. Moulton of the University of Chicago, is secretary.

The board of directors includes Prof. W. W. Atwood, Harvard; Dr. W. C. Bagley, Columbus; Prof. O. W. Caldwell, Columbia; Prof. J. M. Coulter, Chicago; Prof. V. C. Vaughan, Michigan; Prof. F. R. Moulton, Chicago; Prof. W. F. Russell, Iowa; Prof. Salisbury, and H. L. Clarke, Chicago. Other noted educators make up the advisory board, which includes C. E. Chadsey, University of Illinois; L. D. Coffman, University of Minnesota; L. T. Damon, Brown university; J. Paul Goode, University of Chicago, and F. J. Kelley, University of Kansas.

The eyes of the educational world long have been turned toward moving pictures, particularly for the grades, but heretofore pictures have not been prepared under the direction of competent educators. The Society for Visual Education disclaims any intention of entertainment, but, believing the quickest path to the brain is through the eye, will use films to multiply the power of thorough, accurate and quick observation.

Nature Herself to Tell Age of Cliff Dwellings

HOW old are the cliff dwellings in Mesa Verde National park and other prehistoric ruins in the American Southwest? It has seemed that this question could never be definitely answered. There are no written records, and the Indians have no traditions concerning the prehistoric people—who they were, when they lived and what became of them.

Now nature's records are likely to furnish the information sought. Some fifty pieces of wood from the ruins at Aztec, N. M., have been sent to Dr. A. E. Douglass in California. He expects, after examining the wood, to be able to tell the exact year in which the logs were cut and placed in the floors and the ceilings in the houses.

Prof. Earl Morris of Silverton, Colo., who has spent many years studying the Southwest, sent the ancient timbers to Doctor Douglass. He says, concerning the experiment:

"It is common knowledge that the growth of each year adds a ring of wood to the circumference of the trunk of a tree. The amount of rainfall and the influence of the solar activity during any given year determine relative thickness, and composition of the wood that grows in that year.

"For nearly two decades Doctor Douglass has been studying the sequoias of California and the pines eastward to the continental divide. He has discovered that rainfall over this entire region has varied with the same distinct rhythm—a series of more moist ones for 3,218 years, the age of the oldest sequoias examined.

"The character of the rings, which grew during each cycle, differs in some particulars from that of every other cycle of rings in a piece of pine cut at an unknown date, and finding out where the same peculiarities occur in the 3,000-year record preserved in the sequoias, it can be stated when the tree grew, and the year in which it was felled."

Thirty-Three Cities Enjoying Daylight Saving

DAYLIGHT saving is in effect in at least thirty-three American cities and towns, notwithstanding the repeal of the law by congress last summer over President Wilson's veto, according to the National Daylight association. Daylight, at least, is supplied at no higher rates than before the war.

The cities and towns which have adopted daylight saving ordinances include the following:

New York—New York city, Buffalo, Cohoes, Troy, Utica, Syracuse, Yonkers.

New Jersey—Camden, Plainfield, New Brunswick, Hoboken, Jersey City, Massachusetts—Clinton, Lynn, Worcester, Marlboro.

Pennsylvania—Philadelphia, Pittsburgh, Corry, Allentown, Harrisburg, Easton, Connecticut—Hartford, Putnam.

Maine—Portland, South Portland, New Hampshire—Manchester, Michigan—Detroit, St. Joseph, Colorado—Denver.

Ohio—Columbus, Delaware—Wilmington.

"We do not expect any confusion," said Marcus M. Marks, president of the organization which has been fighting for the daylight saving. "The time adopted by New York city, for instance, is automatically observed by all cities and towns within a radius of 50 miles or more of the metropolis. The same can be said of Philadelphia and Pittsburgh.

Its adoption by New York city, however, materially affected business hours and conditions in stock and trade markets in many parts of the country.

Thousands of Women

Owe Their Health To

Lydia E. Pinkham's Vegetable Compound—overshadowing indeed is the success of this great medicine. Compared with it, all other medicines for women's ills seem to be experiments.

Why is it so successful? Simply because of its sterling worth. For over forty years it has had no equal. Women for two generations have depended upon it with confidence.

Thousands of Their Letters are on our files, which prove these statements to be facts, not mere boasting.

Here Are Two Sample Letters:

Mother and Daughter Helped.

Middleburg, Pa.—"I am glad to state that Lydia E. Pinkham's Vegetable Compound did me much good when I was 35 years old. I was run down with female trouble and was not able to do anything, could not walk for a year, and could not work. I had treatment from a physician but did not gain. I read in the papers and books about Lydia E. Pinkham's Vegetable Compound and decided to try it. The first few bottles gave me relief and I kept on using it until I got better and was able to do my work. The Vegetable Compound also regulated my daughter when she was 15 years old. I can recommend Vegetable Compound as the best medicine I have ever used."—Mrs. W. YERGER, R. 3, Box 21, Middleburg, Pa.

Fall River, Mass.—"Three years ago I gave birth to a little girl and after she was born I did not pick up well. I doctored for two months and my condition remained the same. One day one of your little books was left at my door and my husband suggested that I try a bottle of Lydia E. Pinkham's Vegetable Compound. I started it immediately and I felt better and could eat better after the first bottle, and I continued taking it for some time. Last year I gave birth to a baby boy and had a much easier time as I took the Vegetable Compound for four months before baby came. On getting up I had no pains like I had before, and no dizziness, and in two weeks felt about as well as ever."—Mrs. THOMAS WILKINSON, 363 Columbia Street, Fall River, Mass.

Wise Is the Woman Who Insists Upon Having

Lydia E. Pinkham's Vegetable Compound

LYDIA E. PINKHAM MEDICINE CO. LYNN, MASS.

Every woman gets a lot of satisfaction out of her belief that other women envy her.

He that falls in love with himself will have no rivals.—Franklin.

COAL DUST LODGED IN MINER'S LUNGS

Tells how his cough was conquered and health restored.

"In November, 1915, I was working in a coal mine and the doctors said the coal dust had settled in my lungs. I couldn't lie down on my right side, coughed so I couldn't sleep and had constant pain in my right lung and under my shoulder blades. I coughed so hard the blood would spit out of my nose. Finally the doctors had me change climate and live outdoors, but didn't improve.

"Then I came home and started on Milks Emulsion. Thank God I did, as it did me a lot of good right from the start, loosening up the coal dust in my right lung. In a few weeks my lungs were free. I could sleep like a baby, had an excellent appetite and my cough left me entirely. I gained back 30 pounds in weight and went back to work in the mines completely restored to health."—G. H. Bunn, 6th Ave. & No. 13th St., Terre Haute, Ind.

Thousands of victims of dust-filled air develop the same trouble that Mr. Bunn had. Milks Emulsion costs nothing to try, so why not at least try it?

Milks Emulsion is a pleasant, nutritive food and a corrective medicine. It restores healthy, natural bowel action, doing away with all need of pills and physics. It promotes appetite and quickly puts the digestive organs in shape to assimilate food. It helps build flesh and strength, and is a powerful aid in resisting and repairing the effects of wasting diseases.

This is the only solid emulsion made, and so palatable that it is eaten with a spoon like ice cream.

No matter how severe your case you are urged to try Milks Emulsion under this guarantee—Take six bottles home with you, use it according to directions, and if not satisfied with the results your money will be promptly refunded. Price 90c and \$1.20 per bottle. The Milks Emulsion Co., Terre Haute, Ind. Sold by druggists everywhere.—Adv.

Music as a curative power was employed by the Romans in case of gout and sciatica.

WOMEN NEED SWAMP-ROOT

Thousands of women have kidney and bladder trouble and never suspect it. Women's complaints often prove to be nothing else but kidney trouble, or the result of kidney or bladder disease.

If the kidneys are not in a healthy condition, they may cause the other organs to become diseased.

Pain in the back, headache, loss of ambition, nervousness, are often times symptoms of kidney trouble.

Don't delay starting treatment. Dr. Kilmer's Swamp-Root, a physician's prescription, obtained at any drug store, may be just the remedy needed to overcome such conditions.

Get a medium or large size bottle immediately from any drug store.

However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Adv.

Sure Relief

BELL'S FOR INDIGESTION

The Army of Constipation

Is Growing Smaller Every Day

CARTER'S LITTLE LIVER PILLS are responsible. Not only relieve constipation, but correct biliousness, sick headache, indigestion, salivary gland— they never fail—renewal of regular habits follow. Purely vegetable.

Small Pill—Small Dose—Small Price

DR. CARTER'S LITTLE LIVER PILLS, Nature's great nerve and blood tonic for Anemia, Rheumatism, Nervousness, Sleeplessness and Female Weakness.
